VENUE

Medi City, Daegu
Daegu, Korea’s third-largest city with 2.5 million citizens, has established its reputation as Korea’s leading medical city with five medical schools and over 3,500 clinics. The government-created Daegu High-tech Medical Cluster, which includes the New Drug Development Center, Laboratory Animal Center, and many government-sponsored research facilities, is providing R&D support for cutting-edge drugs and medical devices. Furthermore, Daegu is full of cultural assets represented by nine UNESCO World Heritage Sites boasting the traditional beauty of Korea. Daegu is thriving today in its role as the national leader built upon a rich cultural heritage and a long history of leading medical industries.

Dear colleagues and friends,

On behalf of the organizing committee, it is my great honor and pleasure to invite you to the 23rd Asian Congress on Occupational Health 2020 (ACOH 2020) to be held at EXCO in Daegu, Korea, from May 27 to 29, 2020, hosted by the Korean Society of Occupational and Environmental Medicine (KSOEM). With the theme, “Happy Workers’ Life: Translating Knowledge into Action,” ACOH 2020 will bring together occupational health researchers, practitioners, and policymakers from all counties in Asia to share their accumulated knowledge and experience on improving workers’ health and safety.

Daegu, the venue of this congress, is located in the Southeast part of the Korean Peninsula, and it has been the center of history, administration, education, and culture for a very long time. Furthermore, with the transportation network expertly linked in all directions, it is a facet that leads to numerous cultural heritages and tourist attractions to effectively showcase Korean culture.

We believe that the ACOH 2020 will be rewarding as it will meet your expectations with social, cultural, and scientific experience. With this, we look forward to welcoming you to Daegu in May 2020!

Jong Uk Won, Ph.D.
Chair of organizing committee, ACOH 2020
